RESEARCH AREA:

- Dynamic analysis of agricultural machines and mechanisms: improvement of work parameters and construction;
- Research of acoustical pollution of environmental and means of vibrations reduction;

MAIN PROJECTS:

International:

National:

- VMSF, Examination and Supervision of High-tech project “Hybrid ballistic protection package with the creation of intelligent structures using calculating patterns”, 2007-2009

Other:

- Member of European Social Fund-funded project "Efficiency of Study System in Lithuanian University of Agriculture", ASU (2010-2011).
- Prepared and conducted surveillance application with support of the foreign teacher visit in ASU funding from the Ministry of Educationa and Research, 2012-06-05. Contract No. S-362.
